

Sushant Shah Kanu

Software Engineer

✉ guptasushant393@gmail.com ☎ +1 (571) 245-0258 in sushant393 🌐 chaoentropeq 📁 Portfolio 📍 Washington DC, USA

PROFILE

Software engineer driven by the thrill of turning complex challenges into sleek, scalable solutions. I dive deep into full-stack and cloud realms but also thrive in finding unconventional ways to connect technology with real-world impact.

TECHNICAL SKILLS

- Programming Languages:** Python, TypeScript, JavaScript, C, C++, Java
- Web Development & Frameworks:** React, Node.js, Express, TailwindCSS, FastAPI, Django, Spring Boot
- Databases:** PostgreSQL, MySQL, MongoDB
- Cloud & DevOps:** AWS (Lambda, RDS, API Gateway), Jenkins, Docker

EDUCATION

- **Virginia Tech** Alexandria, VA, USA
Master of Engineering in Computer Science Jan 2025 – Dec 2026
- **Malla Reddy College of Engineering & Technology** Hyderabad, India
Bachelor of Technology in Computer Science Engineering Aug 2017 – Sep 2021

PROFESSIONAL EXPERIENCE

- **Full Stack Developer** | *Bharat Tech* Jan 2024 – Nov 2024
Bharat Tech, India
 - Architected and deployed interactive, responsive web application interfaces, enabling non-technical stakeholders to intuitively explore and filter complex datasets.
 - Engineered production-ready microservices and REST API endpoints to stream, process and render backend survey and transactional data into live frontend views.
 - Optimized frontend application architecture through code splitting, lazy loading, and state memoization, reducing page load times by 30% and maintaining high performance during dynamic data rendering.
- **Front-end Developer Intern** | *Bharat Tech* Oct 2023 – Jan 2024
Bharat Tech, India
 - Collaborated with senior developers to design and implement responsive UIs using HTML, CSS, and JavaScript, improving the user experience of core web applications.
 - Converted static design mockups into interactive web pages using ReactJS and integrated them with backend APIs, ensuring seamless data flow.
 - Gained hands-on experience with React, TailwindCSS, and Webpack, building a strong foundation in modern front-end development practices.

PROJECTS

- **SplitIt** | *ReactJS, TypeScript, TailwindCSS, Gemini API, ExpressJS, NodeJS* Link
 - Built a full-featured, responsive bill-splitting application allowing users to create groups, upload bills, and fairly divide expenses; currently **serving 10+ active daily users**.
 - **Smart Bill Parsing:** Integrated **Gemini API** to extract and process line items from uploaded bill images for seamless, automated data entry.
 - Engineered relational schema design and optimized SQL queries in MySQL to handle user accounts and record the splits.
 - Engineered secure, cloud-deployed serverless REST APIs using AWS lambda and API gateway, implementing structured data pipelines and secure transaction protocols.
- **The Infinite Shelf** | *Spring Boot, JSP, React, CSS, AWS Lambda, RDS, API Gateway* GitHub
 - Designed and implemented a full-stack online bookstore web application with features including book previews and an integrated marketplace.
 - Engineered a production-ready serverless REST API using AWS Lambda, RDS, and API Gateway, handling all CRUD and transaction operations.
 - Designed and managed the relational database schema in AWS RDS, leveraging SQL for efficient data retrieval and transaction handling across API endpoints.
 - Implemented a secure payment gateway enabling customers to purchase books with end-to-end transaction integrity.
